INDEX OF TABLES AND FIGURES

TABLES

HUNGARIAN LABOUR MARKET
Table 1: Evolution of the number of employed by certain important aspects .............................................. 23
Table 2: The number of persons who reported a foreign workplace in the labour force survey of the CSO by target country, 2017 .............................................. 24
Table 3: Number and employment rate of Hungarians living in other EU Member States ......................... 25
Table 4: Evolution of the number of the employed and the potential labour reserve, 2010–2017 ..................... 29
Table 5: Net and real earnings calculated with the family tax relief, 2017 ................................................. 38

IN FOCUS
Table 2.1: The contribution of public works, employment abroad and population decline to the increase in the employment rate between 2000 and the first quarter of 2017 .................. 55
Table 3.2: Average annual income levels for women and men in geographic areas of the European Union (in thousands of Euros at 2015 prices, adjusted for purchasing power parity; 25–60-year-olds commanding personal income) ............... 77
Table 4.2: Dimensions of vulnerability among men and women .............................................................. 92
Table 4.3: The impact of restrictions on access to abortion in 1974 on the share of children born with birth defects ................................................................................................................. 97
Table 5.1: Difference in the share of educational attainment between women and men in younger age groups, 2017 .............................................................. 99
Table 5.2: Gender gaps in test scores (boys-girls) and the characteristics of the education system in European countries, 2015 ................................................................. 107
Table 5.3: Employment chances of women compared to men ................................................................. 112
Table 5.4: Application decision in higher education ranking ................................................................. 116
Table 5.4: Higher education applications ......................................................................................... 117
Table 5.4: Application decisions of first ranked options ................................................................. 118
Table 5.4: The simulated impact of the alternative higher education policy. Counterfactual analysis: the impact of open access to STEM programs ....................................................... 119
Table 7.1: Average differences in health indicators by employment status, controlling for demographic and socio-economic factors, among women aged 50–59 in Hungary .... 145
Table 7.2: Differences in employment rates between countries, controlling for age, qualification, type of settlement and the distribution of health, among women aged 50–59 ........ 145
Table 8.1: Background characteristics and fertility of women .............................................................. 152
Table 8.1: The relationship between teenage motherhood and the outcome variables ......................... 154
Table 8.2: The impact of the availability of child-care services on the labour supply of mothers (β) and the most relevant institutional characteristics .............................................. 157
Table 10.1: Gender wage gap estimates, private sector ................................................................. 174
Table 11.1: The monthly amount of the family allowance per child, since 2008 (HUF) ......................... 178
Table 11.2: The monthly amount of family tax credit per child, 2011–2018 (HUF) .................................... 180
Table 12.1: The number and age of females taking old-age retirement ..................................................... 192
Table 12.2: Data of Female40, 2013 .................................................................................................................. 193
Table 12.3: Relative benefits of Females 40, retiring in 2013, in terms of nationwide net age ............ 193
Table 12.4: Condensed contingency table on females retiring in 2016, Retirement age=63 .................. 194
Table 12.5: Condensed contingency table on females retiring in 2016, Female40 ................................... 194
Table 12.6: Three-class aggregation: partial statistics ........................................................................... 195
Table 12.7: Averages for the three classes ......................................................................................... 195

POLICY TOOLS

Table F1: Expenditures and revenues of the right section of employment policy in the national budget, 2012–2018 (in HUF) ................................................................. 207

STATISTICAL DATA
Table 1.1: Basic economic indicators ......................................................................................... 211
Table 2.1: Population ........................................................................................................... 213
Table 2.2: Population by age groups, in thousands ......................................................... 213
Table 2.3: Male population by age groups, in thousands ................................................... 215
Table 2.4: Female population by age groups, in thousands .................................................. 215
Table 3.1: Labour force participation of the population over 14 years, in thousands ......................... 216
Table 3.2: Labour force participation of the population over 14 years, males, in thousands .......... 217
Table 3.3: Labour force participation of the population over 14 years, females, in thousands .......... 218
Table 3.4: Labour force participation of the population over 14 years, per cent ......................... 219
Table 3.5: Labour force participation of the population over 14 years, males, per cent ................. 220
Table 3.6: Labour force participation of the population over 14 years, females, per cent ............... 221
Table 3.7: Population aged 15–64 by labour market status (self-categorised), in thousands .......... 222
Table 3.8: Population aged 15–64 by labour market status (self-categorised), per cent ................. 223
Table 4.1: Employment ................................................................. 224
Table 4.2: Employment by gender ......................................................................................... 225
Table 4.3: Composition of the employed by age groups, males .............................................. 226
Table 4.4: Composition of the employed by age groups, females ............................................. 226
Table 4.5: Composition of the employed by level of education, males, per cent ......................... 227
Table 4.6: Composition of the employed by level of education, females, per cent ...................... 227
Table 4.7: Employed by employment status, in thousands ................................................... 228
Table 4.8: Composition of the employed persons by employment status, per cent ......................... 228
Table 4.9: Composition of employed persons by sector, by gender, per cent ......................... 229
Table 4.10: Employed in their present job for 0–6 months, per cent ........................................... 229
Table 4.11: Distribution of employees in the competitive sector by firm size, per cent .................. 230

297
Table 4.12: Employees of the competitive sector by the share of foreign ownership, per cent .................................................. 230
Table 4.13: Employment rate of population aged 15–74 by age group, males, per cent .................................................. 231
Table 4.14: Employment rate of population aged 15–74 by age group, females, per cent .................................................. 231
Table 4.15: Employment rate of population aged 15–64 by level of education, males, per cent .................................................. 234
Table 4.16: Employment rate of population aged 15–64 by level of education, females, per cent .................................................. 233
Table 5.1: Unemployment rate by gender and share of long term unemployed, per cent .................................................. 234
Table 5.2: Unemployment rate by level of education, males, per cent .................................................. 235
Table 5.3: Composition of the unemployed by level of education, males, per cent .................................................. 235
Table 5.4: Unemployment rate by level of education, females, per cent .................................................. 236
Table 5.5: Composition of the unemployed by level of education, females, per cent .................................................. 236
Table 5.6: The number of unemployed by duration of job search, in thousands .................................................. 238
Table 5.7: Registered unemployed and LFS unemployment .................................................. 240
Table 5.8: Composition of the registered unemployed by educational attainment, yearly averages, per cent .................................................. 241
Table 5.9: The distribution of registered unemployed school-leavers by educational attainment, yearly averages, per cent .................................................. 241
Table 5.10: Registered unemployed by economic activity as observed in the LFS, per cent .................................................. 241
Table 5.11: Monthly entrants to the unemployment register, monthly averages, in thousands .................................................. 242
Table 5.12: Selected time series of registered unemployment, monthly averages .................................................. 243
Table 5.13: The number of registered unemployed who became employed on subsidised and non-subsidised employment .................................................. 244
Table 5.14: Benefit recipients and participation in active labour market programmes .................................................. 245
Table 5.15: The ratio of those who are employed among the former participants of ALMPs, per cent .................................................. 246
Table 5.16: Distribution of registered unemployed, unemployment benefit recipients and unemployment assistance recipients by educational attainment .................................................. 247
Table 5.17: Outflow from the Register of Beneficiaries .................................................. 248
Table 5.18: The distribution of the total number of labour market training participants .................................................. 248
Table 5.19: Employment ratio of participants ALMPs by gender, age groups and educational attainment for the programmes finished in 2017, per cent .................................................. 249
Table 5.20: Distribution of the average annual number of those with no employment status who participate in training categorised by the type of training, percentage .................................................. 249
Table 5.21: The distribution of those entering training programmes by age groups and educational level .................................................. 250
Table 6.1: Annual changes of gross and real earnings .................................................. 251
Table 6.2.a: Gross earnings ratios in the economy, HUF/person/month .................................................. 252
Table 6.2.b: Gross earnings ratios in the economy, per cent .................................................. 253
Table 6.3: Regression-adjusted earnings differentials .................................................. 254
Table 6.4: Percentage of low paid workers by gender, age groups, level of education and industries .................................................. 255
Table 7.1: Graduates in full-time education .................................................. 258
Table 7.2: Pupils/students entering the school system by level of education, full-time education .................................................. 259
Table 7.3: Students in full-time education .................................................. 260
Table 7.4: Students in part-time education .................................................. 260
Table 7.5: Number of applicants for full-time high school courses .................................................. 261
Table 8.1: The number of vacancies reported to the local offices of the NFSZ .................................................. 262
Table 8.2: The number of vacancies reported to the local offices of the NFSZ, by level of education .................................................. 263
Table 8.3: The number of vacancies .................................................. 263
Table 8.4: Firms intending to increase/decrease their staff .................................................. 264
Table 9.1: Regional inequalities: Employment rate .................................................. 265
Table 9.2: Regional inequalities: LFS-based unemployment rate .................................................. 266
Table 9.3: Regional differences: The share of registered unemployed relative to the economically active population, per cent .................................................. 267
Table 9.4: Annual average registered unemployment rate by counties, per cent .................................................. 268
Table 9.5: Regional inequalities: Gross monthly earnings .................................................. 269
Table 9.6: Regression-adjusted earnings differentials .................................................. 269
Table 9.7: Regional inequalities: Gross domestic product .................................................. 270
Table 9.8: Commuting .................................................. 270
Table 10.1: Strikes .................................................. 273
Table 10.2: National agreements on wage increase recommendations .................................................. 273
Table 10.3: Single employer collective agreements in the business sector .................................................. 274
Table 10.4: Single institution collective agreements in the public sector .................................................. 274
Table 10.5: Multi-employer collective agreements in the business sector .................................................. 274
Table 10.6: Multi-institution collective agreements in the public sector .................................................. 274
Table 10.7: The number of firm wage agreements, the number of affected firms, and the number of employees covered .................................................. 274
Table 10.8: The number of multi-employer wage agreements, the number of affected firms, and the number of covered companies and employees .................................................. 275
Table 10.9: The share of employees covered by collective agreements, percent .................................................. 275
Table 10.10: Single employer collective agreements in the national economy .................................................. 276
Table 10.11: Multi-employer collective agreements in the business sector .................................................. 277
Table 11.1: Family benefits .................................................. 278
Table 11.2: Unemployment benefits and average earnings .................................................. 278
Table 11.3.a: Number of those receiving pension, and the mean sum of the provisions they received in January of the given year .................................................. 279
Table 11.3.b: Number of those receiving pension, and the mean sum of the provisions they received in January of the given year .................................................. 279
Table 11.4.a: Number of those receiving social annuities for people with damaged health, and the mean sum
of the provisions they received after the increase, in January of the given year .............................. 280
Table 11.4.b: Number of those receiving social annuities for people with damaged health, and the mean sum of the provisions they received after the increase, in January of the given year, from 2016 ................................ 280
Table 11.5: The median age for retirement and the number of pensioners .............................. 281
Table 11.6: The number of those receiving a disability annuity and the mean sum of the provisions they received after the increase, in January of the given year .................................................. 282
Table 11.7: Newly determined disability pension claims and detailed data on the number of newly determined old-age pension claims .... 282
Table 11.8: Retirement age threshold ........................................ 283
Table 12.1: The mean, minimum, and maximum value of the personal income tax rate, per cent .............. 284
Table 12.2: Changes in the magnitude of the tax wedge in the case of minimum wage and the temporary work booklet (AMK) .............. 285
Table 12.3: The monthly amount of the minimum wage, the guaranteed wage minimum, and the minimum pension, in thousands of current-year HUF .......................................................... 286
Table 12.4: The tax burden on work as a ratio of tax revenue and earnings ........................................ 287
Table 13.1: Employment and unemployment rate of population aged 15–64 by gender in the EU .................. 288
Table 13.2: Employment composition of the countries in the EU ..................................................... 289
Table 13.3: The ration of vacancies, IV. quarter, 2017 ................................................................. 290

FIGURES

HUNGARIAN LABOUR MARKET
Figure 1: The number of employed persons and the employment rate of age group 15–64, 2010–2017 .......... 22
Figure 2: Employment rate of men and women at age 20–64 by age group, 2017 (percent) .................. 26
Figure 3: The number of job vacancies in the business sector ...................................................... 28
Figure 4: Evolution of the number of public workers, 2013–2017 (thousand persons) ............................ 30
Figure 5: Proportion of long-term unemployed and average length of unemployment ............................ 31
Figure 6: The Proportion of job vacancies and the labour reserve by regions, 2017 ................................ 33
Figure 7: Growth rate of gross salaries (2013 = 100 percent) ..................................................... 34
Figure 8: The evolution of gross earnings in the public sector in the most important sectors of the national economy (without public workers, thousand HUF) .......................................... 37

IN FOCUS

Figure 2.1.1: Selected indicators of employment, unemployment and inactivity in the population aged 15–64, 1992–2016 (percentage) ... 54
Figure 2.1.2: Some characteristics of male and female employment .... 57
Figure 2.1.3: The wages of women compared to those of men, 1986–2016 (percentage) .......................... 58
Figure 2.1.4: The importance of the public sector in female employment and wages, 1986–2016 ............ 59
Figure 2.1.5: The earnings disadvantage of women (both sectors) and of public sector employees (both genders), 1986–2016, logarithmic point ...................................................... 61
Figure 2.2.1: The evolution of real wages in the private sector, 1994–2016 (1994 = 100) ...................... 63
Figure 2.2.2: Within-firm gender wage gap by educational attainment ............................................. 64
Figure 2.3.1: Educational attainment in management, 2015–2017 ....... 66
Figure 2.3.2: The share of women in management categories (2011 and 2016) ....................................... 67
Figure 2.3.3: The share of female managers in information and communications technology and in education ...................................... 67
Figure 2.3.4: Average wages of men and women in management positions, 2016 .................................. 68
Figure 3.1.1: Relative female employment rate in post socialist EU countries, EU15 = 1 .......................... 71
Figure 3.2.1: Inequality of personal income among women and men as measured by the log variance in geographic areas of the European Union (25–60-year-olds with personal income) ........................................ 77
Figure 3.2.2: Household characteristics and their effect on pooled income ........................................ 78
Figure 3.3.1: The equalised net household income one month, six months and two years after the birth of a child, as a percentage of their prior net income .................................................. 82
Figure 3.3.2: The employment rate of mothers aged 15–64, with at least one child, working full-time or part-time, 2014 ...................................................... 84
Figure 3.3.3: Employment rate of mothers (full or part time) and the participation of children aged 0–2 in formal childcare, 2014 ........... 85
Figure 5.1.1: The difference in the share of educational attainment levels among men and women aged over 15 in Hungary, 1990, 2001, 2011 and 2016 ........................................ 99
Figure 5.1.2: The share of the genders within the pupils of the different types of upper-secondary schools in Hungary, 2004–2017 ........................................ 100
Figure 5.1.3: The share of women in higher education in Hungary, 1990–2017 .................................. 101
Figure 5.1.4: The proportion of early school leavers in Hungary broken down by gender, 2006–2016 ....... 101
Figure 5.1.5: Differences in the proportions of fields of studies of degrees obtained by women and men aged 30–34 in Hungary 1990, 2001, 2011 and 2016 ........................................ 102
Figure 5.2.1: Gender gaps in test scores (boys-girls) in European countries, 2015 .................................. 105
Figure 5.2.2: The impact of early selection on the gender gaps in literacy test scores (boys-girls) in European countries, 2015 ................................. 108
Figure 5.2.3: Gender gaps in test scores by students’ performance in Hungary, 2013-2017 ...................... 109
Figure 5.3.1: Share of girls in different vocational programmes (%) ........................................... 111
Figure K6.1.1: Association between changes in the locus of control and individual characteristics and life events ................................................................. 130
Figure K6.3.1: The impact of praise and encouragement according to gender – difference in scores between the treatment and control groups during the game .............. 140
Figure 7.1: Subjective health by employment status ............................................................. 142
Figure 7.2: Number of chronic diseases and symptoms by employment status ......................................... 142
Figure 7.3: Occurrence of diseases by employment status ....................................................... 143
